VIP3000 - the quality network for clean room and pharmaceutical construction

The Verein Interessengemeinschaft Pharmabau 3000 e. V. - aka VIP3000 - brings together ideas and visions in the area of clean room and pharmaceutical construction. Leading companies and research institutions from the German pharmaceutical, chemical and cosmetics industries, their suppliers, as well as planners and universities are involved in the association.

Together, the approximately 60 members form a quality network with the goal of promoting the technologies required for the planning and realization of modern pharmaceutical premises as well as associated fields of activity, introducing new insights and applications, and supporting their practice-oriented implementation. An emphasis lies on the areas of pharmaceutical process engineering, building services and the construction of production sites in accordance with pharmaceutical requirements.

YOUR VIP3000 BENEFITS

- professional network
- expert knowledge
- always keeping pace with the times
- exchange of experience at a high level
- successful in global competition
- expert group of consultants, experts, and suppliers
- lectures and symposiums

The practical reference work for those involved in planning, constructing and designing production and research centres for the pharmaceutical industry:

planning and building management staff of national and international pharmaceutical companies; contractors and executives of companies who need "clean rooms" for their production.

- best practice principles
- index of members and their skills
- brief portraits and contacts
- international experience of members
- industry trends
- quick facts

Our competences

The VIP3000 performance honeycomb represents a compendium of knowledge and at the same time provides an overview of the necessary competencies in a pharmaceutical project – from initial services in planning through the expansion phases to actual operation.

The VIP3000 ensures that the number of multiple providers for the same services/deliveries does not violate compliance rules and still retains the important network idea in the sense of “one-stop shopping”.
The variety of services offered by our VIP members and their associated competences is evident from the honeycomb of services.
